### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 01 May 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 and 17-19, drawn to an apparatus for providing inventory control of medical objects comprising: a scanner; a counter for receiving the signal from the scanning device and determine a first count of the medical objects before the surgical procedure and a second count of the medical objects after the surgical procedure; and a reconciling device for receiving the first and second counts from the counter and for comparing the first count and the second count to determining if the first count equals the second count, classified in class 705, subclass 29.
- II. Claims 11-14, drawn to an apparatus for providing inventory control of medical objects comprising: a container for storing the medical objects; a counter for count for counting the medical objects upon insertion into the container; and a display contacted to the counter for displaying a count of the medical objects determined by the counter, classified in class 705, subclass 29.
- III. Claims 15-16, and 20, drawn to an apparatus for providing inventory control of absorbent medical objects, which includes sponges and lap pads, apparatus comprising; a rack for storing the absorbent medical objects after use; a scale of determining an amount of blood contained in the absorbent medical object; and a scanner for scanning the absorbent

medical objects contained on the rack; and a computer system for maintaining a record of the absorbent objects, classified in class 705, subclass 29.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a container for storing the medical objects; a counter for count for counting the medical objects upon insertion into the container; and a display contacted to the counter for displaying a count of the medical objects determined by the counter. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as an apparatus comprising a rack for storing the absorbent medical objects after use; a scale of determining an amount of blood contained in the absorbent medical object; a scanner for scanning the absorbent medical objects contained on the rack; and a computer system for maintaining a record of the absorbent objects. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III, restriction for examination purposes as indicated is proper.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as an apparatus comprising: a rack for storing the absorbent medical objects after use; a scale of determining an amount of blood contained in the absorbent medical object; a scanner for scanning the absorbent medical objects contained on the rack; and a computer system for maintaining a record of the absorbent objects. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

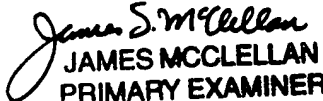

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marissa Thein whose telephone number is 571-272-6764. The examiner can normally be reached on M-F 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alex Kalinowski can be reached on 571-272-6771. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
